This means more money to you!

**NOW YOUR U. S. SERIES E BONDS CAN EARN INTEREST
10 EXTRA YEARS**

ALL YOU wise and patriotic people who bought United States Series E Bonds ten years ago and have held them can benefit by this new law! For according to this law the bonds you expected to mature finally in 1952 can now continue to earn interest every year for ten more years—till 1962—without your even lifting a finger!

To get this extra money, there's absolutely nothing you have to do. Just hold your bonds and let them go on earning!

If you wish, you may still cash any Series E Bond at any time after you've owned it for sixty days. But you'll be better off to hold your bonds, just as you're better off to hold savings in any form.

First of all, as long as you don't cash your bonds, you don't have to pay income tax on the interest they earn. In the second place, cash in the pocket melts away fast—often with little or nothing to show for it. But cash in bond savings is always there—growing steadily toward the big sum which can buy something really worthwhile... And remember—the interest rate on Series E Bonds has been increased to 3% compounded semi-annually, when held to maturity.

So if you have bonds coming due, why not take advantage of your extra-income opportunity? Just sit back and let them go on making more money for you.

And meanwhile keep adding to your cash savings by buying more U. S. Defense Bonds regularly—through the Payroll Savings Plan where you work. It's the easy, systematic saving plan that's so helpful because it lets you save before you even draw your pay. Thousands on the Plan say it's the one sure way to save.

3 NEW MONEY-MAKING OPPORTUNITIES FOR YOU! *New Series H, J, and K Defense Bonds pay 2.76% to 3%*

If you want to get the interest on your bonds in the form of current income, or if you want to invest more than the annual limit for E Bonds, ask at any Federal Reserve Bank or Branch about these new bonds:

SERIES H. A new current income bond, available in denominations of \$500 to \$10,000. Sold at par. Matures in 9 years 8 months and pays approximately 3% interest per annum if held to maturity. Interest paid semiannually by Treasury check. Annual limit, \$20,000 maturity value. Issued only by Federal Reserve Banks and Branches at the Treasury.

SERIES J. A new 12-year appreciation bond, available in denominations of \$25 to \$100,000. Sold at 72% of par value. Pays 2.76% compounded semiannually if held to maturity. Annual limit, \$200,000 issue price jointly with Series K Bonds.

SERIES K. A new 12-year current-income bond in denominations of \$500 to \$100,000. Pays interest semi-annually by Treasury check at the rate of 2.76% per annum. Sold at par. Annual limit, \$300,000 issue price jointly with Series J Bonds.

Christian Science Group Of Canal Point

That the belief of death will be eventually supplemented by the realization of eternal life is the keynote of services in Christian Science churches next Sunday. Subject of the Lesson-Sermon is "PROBATION AFTER DEATH".

The Golden Text is from I Corinthians (6:14): "God hath both raised up the Lord, and will also raise up us by his own power."

Included in passages from the Bible is this: "Search me, O God, and know my heart; try me, and know my thoughts: And see if there be any wicked way in me, and lead me in the way everlasting" (Psalms 139: 23, 24).

Correlated citations from "Science and Health with Key to the Scriptures" by Mary Baker Eddy include: "Anatomy, when conceived of spiritually, is mental self-knowledge, and consists in the dissection of thoughts to discover their quality, quantity, and origin. Are thoughts divine or human? That is the important question" (p. 462).

Here Is An Instance Where A Fellow Bought Cows For 27c And Sold Them For 17c Per Lb. & Still Made Money

Mr. Paul Rardin,
Everglades News,
Canal Point, Fla.

Dear Paul:

Have noted your comments in the editorial which appeared in the last two weeks issues of your paper, concerning the "Glades Cattle Deal", in which you quote an operation which shows a substantial loss. This operation, of course, is small and is a one-time operation which is easy to figure right down to the penny.

I am quoting you another operation which is also small and based on one group of cattle, and I might add; is on the extreme on the other side of the ledger.

This small operator purchased his cattle well up at the top of the market and they cost him 27c per pound for a cost per head of \$84.24 delivered to him. He placed two head per acre in his pasture, kept them thirteen months and sold them at 17c per pound for a total of \$131.75 per head. He did not do any feeding but did keep minerals before them at all times at a cost of \$1.02 per head for the entire period. Figuring his investment of \$84.24 per head at 8% or \$7.31 per head, he cleared \$39.18 per head, or \$78.36 per acre.

Just thought you would be interested in these figures for comparison purposes.

Very truly yours,
Inman W. Weeks.
